

STARGRES®

general catalogue
2025

From one pallet per day in 1989,
to 30 million sqm of annual production in 30 years

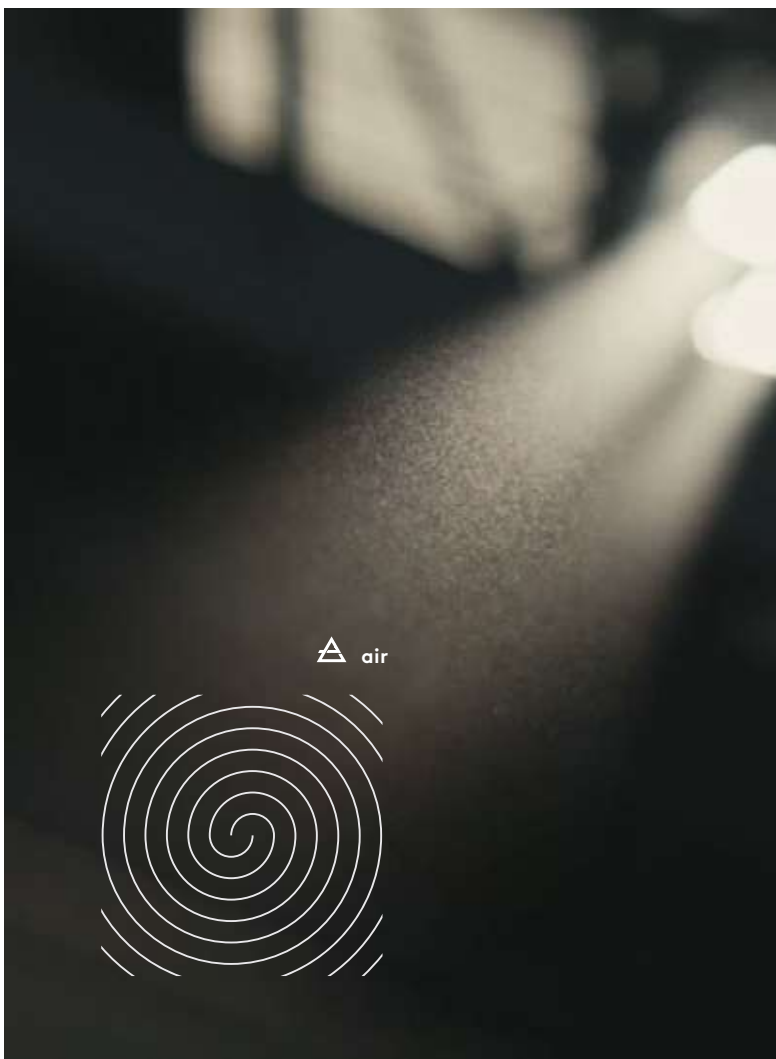

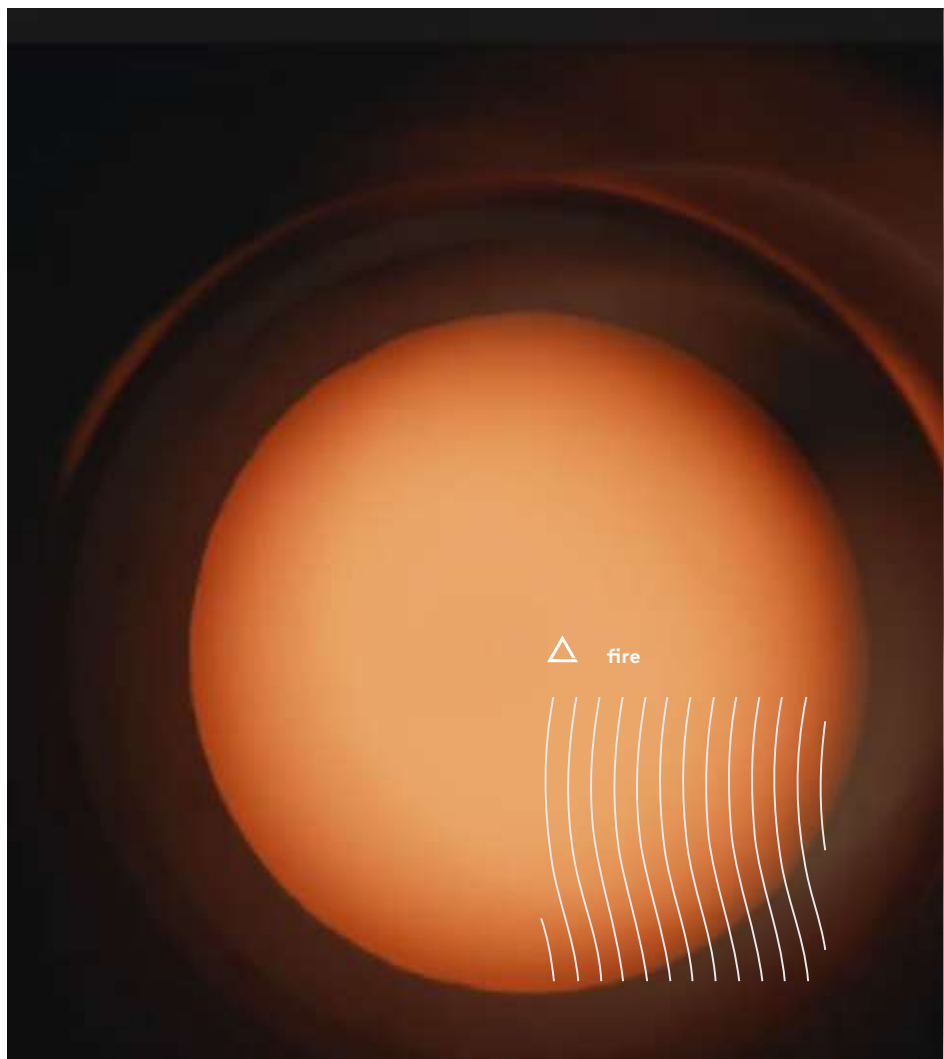

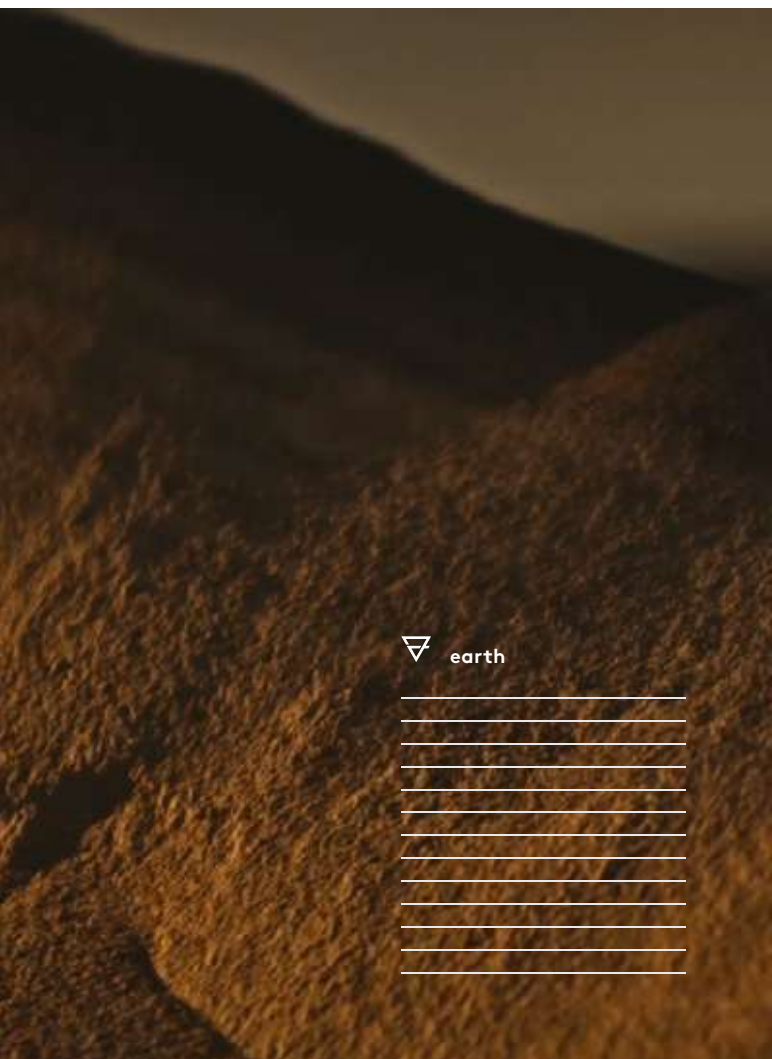

about us

We are a reputable manufacturer of gres tiles, operating in the market since 1989. The top quality of our products has earned us the trust of our customers for over three decades. Modern solutions that combine durability, aesthetics and innovation are our specialty.

Our gres tiles are perfect for both private and commercial spaces. We prioritize sustainable development, modern technologies and attention to detail. Streamlining of the decision-making process allowed us to open another state-of-the-art production line in 2019, which enables the production of 3 cm thick gres tiles in **90x90 cm** format and with a compressive strength of over 3 tons.

Even during the difficult period for the global economy caused by the COVID-19 pandemic, among other things, we managed to remain profitable. The above fact makes the companies plan further dynamic development. In April 2022, we launched **two more 3-cm gres tile production lines**. This gives us an annual increase in production of terrace gres tiles of 1 million m².

The production of ceramic tiles is closely related to nature, ecology and care for natural resources. All four elements — **earth**, **water**, **air** and **fire** — are part of the production process, during which everything is interdependent, interrelated and interconnected. We invest in solutions aimed at reducing gas emissions. The environmentally friendly production cycle minimizes the use of natural resources and reduces the impact on the environment.

The Group's nature conservation activities have been further confirmed by a **Type III Environmental Declaration (EPD)** prepared on the basis of **PN-EN 15804** guidelines and verified by an independent auditor in accordance with **ISO 14025**. Out of concern for the environment, we use modern production methods throughout the entire industrial process to minimize emissions of air pollutants to the greatest possible extent and reduce electricity consumption. We take every measure to minimize the consumption of water, energy and packaging materials.

/ 8 / Star Training Center

Star Training Center - a new space for creative meetings

The opening of a multifunctional training center, **Star Training Center**, will allow us to take the quality of training to the next level and build lasting relationships with our business partners, customers and the design industry. **Star Training Center** is a response to the expectations of our customers, the increasing need for the design industry to expand its product knowledge. This is the result of a change in perspective on participation in events in the exhibition industry. It is a new quality of meeting where nature and innovation meet in harmony and a place where every detail is part of a greater whole that inspires, motivates and supports. The name of the training space has three parts:

The word **“Star”** comes from the name of our Stargres brand, which is the leading brand in the **Końskie Group**, in terms of development and investment. The company's portfolio includes interior and exterior tiles, found in a multitude of formats and textures. At the top of **Stargres'** priority list are high quality and environmentally friendly production, which is why all the company's products meet the most stringent Polish and European standards.

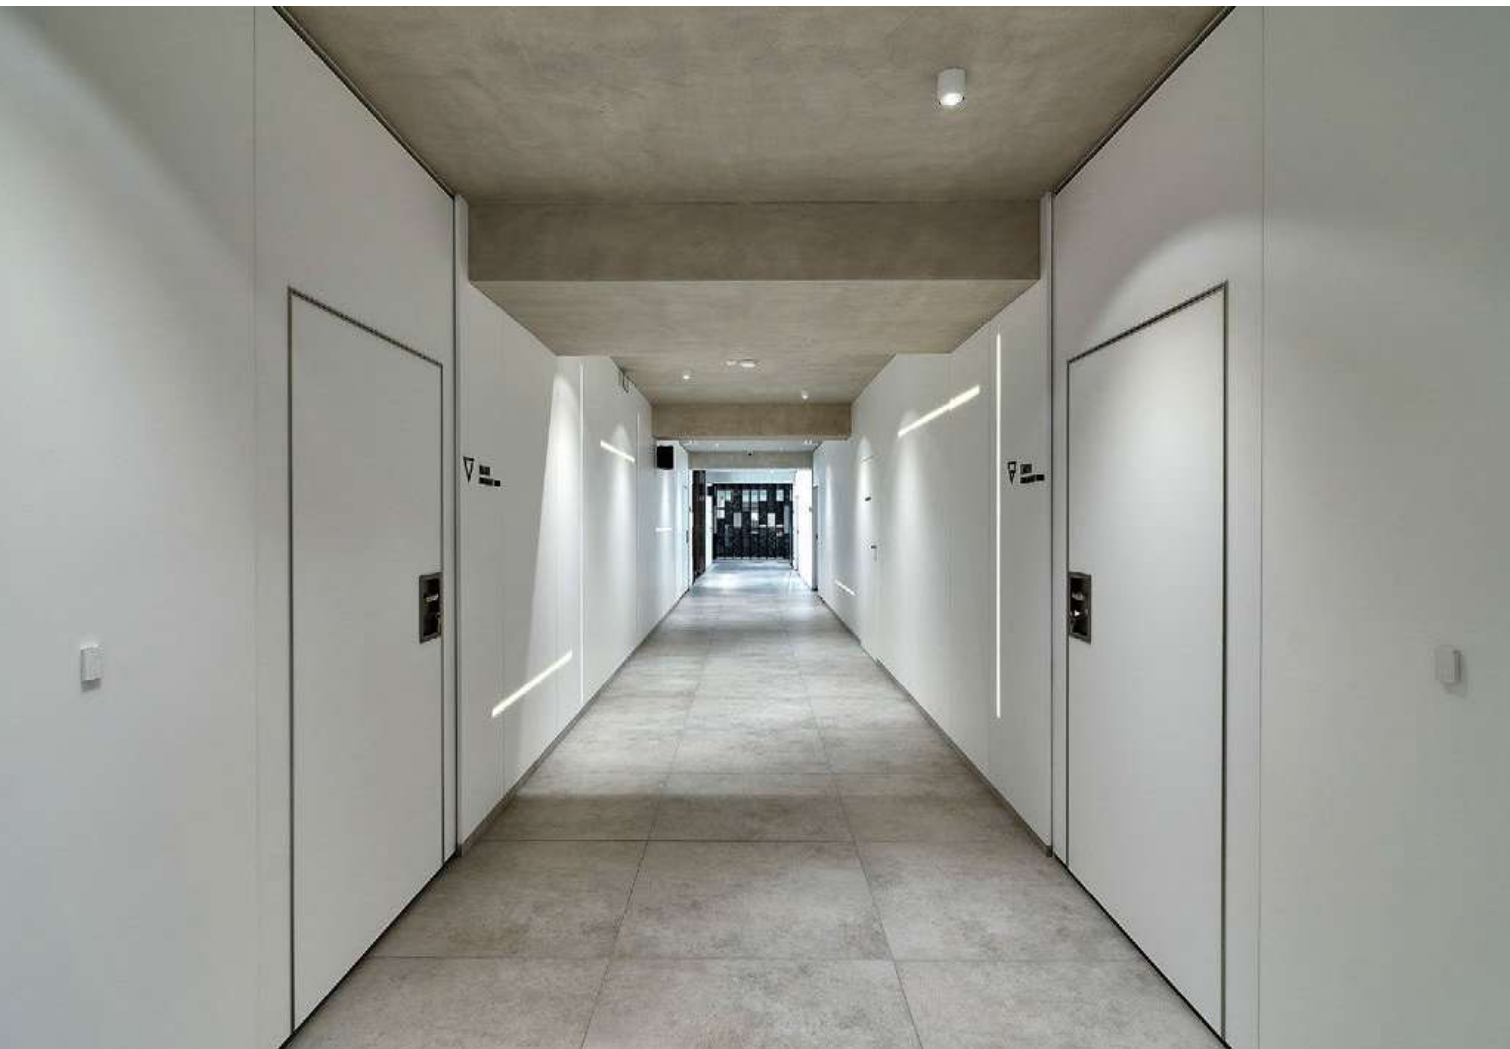

The word **“Training”** literally means that we also build our reputation through workshops tailored to the needs of our customers — distributors, landscape architects, interior designers, and contractors.

The word **“Center”** is there because **Star Training Center** is located in Końskie, Świętokrzyskie voivodeship, in the heart of Poland.

/11/ Star Training Center

5000 m² of space offering new opportunities

Building a new conference and training center right next to our factory is an innovative solution. The area of **5,000 m²** allows us to present to our business partners all sorts of capabilities and solutions that we will be introducing. This is a place where we will be able to meet, talk about important issues, but most importantly strengthen business ties and get to know each other better. We are sure that the formula of meetings in Końskie will replace trade fairs in the future.

Every step, from the foundations to the final finishing touches, was carefully thought out. Today, we are pleased to share the details of this process with you, the process which has resulted in a place created for growth, innovation and collaboration.

Each training room has been modeled after the four elements, as each element is integral to the production of ceramic tiles. **Star Training Center** combines the four elements to create a unique space for architects, contractors and distributors. These elements characterize what is most important in the company — without this extremely close cooperation of four factors, namely stability, passion, authenticity and identity, we would not have been able to build such strong brands of the **Końskie Group**.

▽ earth conference room

The element of **earth**, in production is the most important — it provides us with a base for production. The base includes sands, silts or aggregates. Here, however, earth means the basis for the formation of a company — its roots, or the solid foundations that create it. **Earth** also symbolizes building long-term relationships with employees and our regular partners. **Star Training Center** a place to root new projects and strengthen business friendships.

△ air conference room

Air means freshness, lightness and openness to new ideas. It is an element that brings new insights and encourages thinking outside the box. In our space, **air** symbolizes innovative solutions and a space where every idea has a chance to be freely developed. The conference room is designed for large meetings, conferences and lectures, and can accommodate a total of about 49 people.

▽ water conference room

In the production process **water**, it allows soil and other aggregates to be mixed together so that the mass is in a perfect liquid state. **Water** is a symbol of fluidity, flexibility and adaptability.

In our space, water is a metaphor for the free exchange of ideas, openness to change and the ability to adapt to the different needs of participants. **Water** gives space for reflection and quiet thought, allowing for the development of new ideas.

/14/ Star Training Center

△ fire conference room

The **fire** conference room can be divided into two parts: business and kitchen, both isolated by a sliding wall if necessary. This makes it possible to organize cooking workshops for selected customers with a professional chef. **Fire** symbolizes energy, passion and transformation — an element that drives us to action and inspires the discovery of new solutions. In our training space, it creates an atmosphere that encourages creative thinking and ingenuity
